Clinical Characteristics of Moxifloxacin-Related Arrhythmias and Development of a Predictive Nomogram: A Case Control Study

November 2024 – *The Journal of Clinical Pharmacology* (JCP)

Why is this article important to you?
This activity reintroduces the concept of drug-induced adverse reactions (ADRs), with a focus on a broad-spectrum quinolone and the potential induction of arrhythmias. Being capable of addressing drug-induced reactions in an efficient manner is critical for supporting positive patient outcomes. Learners completing this activity will be able to assess the value of a developed nomogram for the management of drug-induced reactions.

ACPE Accreditation Statement
The American College of Clinical Pharmacology® is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education.
UAN: 0665-0000-24-035-H01-P – ACPE 1 Contact Hours
Activity Type: Knowledge-based **Format:** Home-study **Target Audience**: 'P'

ACCME Accreditation Statement
The American College of Clinical Pharmacology® is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

ACCME Designation Statement
The Accreditation Council for Continuing Medical Education designates this journal CE activity for 1 *AMA PRA Category 1™* credit. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Target Audience
Interprofessional team of Physicians, Physician Assistants, Pharmacists, PhDs and Nurses interested in expanding their knowledge in comparing ontogeny models to inform pediatric drug response.

Learning Objectives
After completing this activity, the learner will be able to:

1. Identify potential adverse drug reactions associated with antimicrobial therapy;
2. Identify potential risk factors for the development of drug-induced disease;
3. Evaluate clinical cases in order to determine risk parameters for moxifloxacin usage;
4. Discuss the utility of the ADE-ASES-II system in identifying ADR potential.

Requirements to Receive Credit
In order to receive continuing medical education (CME) or continuing pharmacy education (CPE) credit, the learner must register for the educational activity, study the provided journal article, complete the online learning Self-assessment Post-test as well as the online course Evaluation and CME/CPE Certificate. Credits and CME/CPE Certificates must be claimed within thirty (30) days of completing the article, Post-test and Evaluation. Contact CE@ACCP1.org with any questions.

Disclosures:

Article Selection:	John van den Anker, MD, PhD, Editor-in-Chief, JCP, selected the article for this course and has nothing to disclose.
Planner:	Steven J. Crosby, MA, BSP, RPh, FASCP, FCP, Associate Dean, Associate Professor of Pharmacy Practice, Massachusetts Coll of Pharmacy & Health Sciences, planned the continuing education documentation for this course and has nothing to disclose.
CE Reviewer:	Ahmed Abulfathi, MD, PhD, Scientist, Certara US Inc, served as the CE Reviewer and all of the relevant financial relationships listed for this individual have been mitigated.

Schedule & Fees
JCP monthly Journal CE articles are generally released on the 1st or 2nd Tuesday of each month. They are priced in packages of January to December for each year. Packages are available at no cost to ACCP Members and $75/calendar year to Non-members. Once you register, you have access to all of the Journal CE articles for the calendar year.

Acknowledgement of Financial Support
No financial support was received for this educational activity.
